EDUCATION

UNIVERSITY OF NEVADA, LAS VEGAS

Expected Graduation - Dec 2027

Bachelor of Arts in Computer Science - GPA: 3.7

TECHNICAL SKILLS

Languages & Markup	C#, C++, C, Python, SQL, JavaScript, jQuery, TypeScript, HTML, CSS
Frameworks & Databases	React, Next.js, Node.js, Express.js, ASP.NET Core MVC, Supabase, PostgreSQL
Tools & Platforms	VS Code, Visual Studio, Git/GitHub, AWS, SSMS, REST API's, PyCharm, ServiceNow ATF

EXPERIENCE

Clark County Water Reclamation District

Jun 2026 – Present

Application Development Intern

Las Vegas, NV

- Developed and maintained in-house web applications utilizing C#, ASP.NET Core MVC, and Sql Server Management Studio (SSMS) to optimize backend workflows and streamline system integration.
- Analyzed complex system architectures and developed backend database solutions to enhance application performance, reliability, and functionality.
- Automated system upgrade validation using ServiceNow ATF, reducing a weeks-long manual testing process into days and significantly improving release efficiency.

Scholarly

Sep 2025 – Jan 2026

Software Engineer Intern

Remote (New York)

- Engineered full-stack functionalities for a social networking platform, using TypeScript, Node.js, and Express.js, integrating RESTful APIs for QR code generation and scanning that reduced user connection time by 30%, and implemented end-to-end tests with Playwright to increase test coverage.
- Architected relational schemas in PostgreSQL and Supabase to support complex organizational workflows and ensure platform scalability.

Skin Esthetics by L.E, LLC

Jul 2025 – Oct 2025

Web Developer (Freelance)

Las Vegas, NV

- Designed and created the official business website to amplify online presence and drive higher client engagement.
- Prioritized a fully responsive interface and optimized site performance to ensure fast, seamless loading speeds across all devices.

PROJECTS

Synqo

September 2026

- Built Synqo, a full-stack Next.js/Supabase app that lets users share their movie, TV, and game taste on a public profile, backed by a relational Postgres Schema with row-level security controlling per-user data access.
- Integrated TMDB/IGDB API's for real-time title search and built passwordless authentication (magic link + one time code) with Supabase Auth, including a fallback that generates placeholder cover art.

Recursive Dream Navigation Simulator

Dec 2025

- Engineered a C++ processing system utilizing recursion and backtracking to execute string manipulation, Fibonacci sequences, and file-based command parsing.
- Utilized Object-Oriented Programming (OOP) principles, including dynamic memory management and custom constructors/destructors, to optimize resource allocation.
